

The Science Education Review

Table of Contents

Volume 6, Issues 1-4, 2007

Did you Know?

- Fish Likely Feel Pain, 1
Restarting a Heart, 43
Nuclear Radiation Surrounds Us, 85
Detecting Mobile Phone Signals, 117

Science Story

- The Mirror Galvanometer, 43
Did Thomas Edison Invent the Light Bulb? 85
First use of Radioactivity, 117

Articles

- Bernoulli? Perhaps, but What About Viscosity? – *Peter Eastwell*, 1
Imaginative Thinking and the Learning of Science – *Yannis Hadzigeorgiou & Nick Fotinos*, 15
Group Work in a Classroom: An Analogy With Organisms in a Community – *Andrej Šorgo*, 28
The Use of History of Science Texts in Teaching Science: Two Cases of an Innovative, Constructivist Approach – *Dimitris Koliopoulos, Sotiris Dossis, & Efthymios Stamoulis*, 44
Travelling the Road Beyond the Curriculum Through a Science Fair – *Lucy Avraamidou & Maria Evagorou*, 60
Oscillating Reactions – *Vladimir M. Petruševski, Marina I. Stojanovska, & Bojan T. Šoptrajanov*, 68
Making Science Lessons Engaging, More Popular, and Equitable Through Emotional Literacy – *Brian Matthews & Emma Snowden*, 86
A Novel Approach to Understanding the Process of Scientific Inquiry – *Mark Anders*, 118
Genomics Analogy Model for Educators (GAME): VELCRO® Analogy Model to Enable the Learning of DNA Arrays for Visually Impaired and Blind Students – *Julia Bello, Charles Butler, Rosanne Radavich, Alan York, Christian Oseto, Kathryn Orvis, & Barry R. Pittendrigh*, 123
Hands-On Science: Does it Matter What Students' Hands are on? – *Lara M. Triona & David Klahr*, 126
Students' Ideas About Changes in Mass Associated With Melting – *Filiz Kabapinar*, 132

Demonstration

- Centripetal Force and the Bowling Ball – *Michael Sobel*, 13
Liquid Nitrogen Explosion, 56
Understanding Dynamic Equilibrium – *Pat Waller*, 87

Critical Incident

- Measuring Pi – *Vladimir D. Yegorenkov*, 23
Running Lane - *Vladimir D. Yegorenkov*, 87
So Where is Your Homework? – *Erica M. Brownstein*, 121

Science Poetry

My Science, 24
Science Saves Lives, 24
Ode to Bacteria, 57
Immunisations, 58
Amoeba, 88
Development of Humans Rap, 88
Way Back When, 122
Hurricane, 122

Students' Alternative Conceptions

Microorganisms, 25
Reflection of Light, 58
Animal or Not? 89
Melting, 124

Teaching Techniques

The Raft Technique, 27
Alternating Think-Pair-Share Review, 59
Bell Work Tasks, 59
Cell Phone Cameras, 90
Using Random Numbers to Form Student Groups, 90
Formative Assessment Techniques, 90
Podcasting, 125

Ideas in Brief

Towards a Theoretical Framework for Teaching Controversial Socio-Scientific Issues – *Ralph Levinson*, 32
Open Days Portray a False Image, 64
The Myth of Teaching to Learning Styles, 65
Field Investigations are not to be Forgotten, 91
A T-Test can Make a Science Project, 91
Blogs, 130

Research in Brief

What Does Out-of-School Learning Offer School Science? – *Martin Braund & Michael Reiss*, 35
Teachers' Emphasis on Evolution in Biology, 65
Multiple Intelligences and Science Learning – *Pınar Özdemir, Sibel Güneysu, & Ceren Tekkaya*, 66
The Views of Clergy on Science and Religion, 93
Views of Science Graduates Working Outside Their Discipline Specialisation – *Susan Rodrigues*, 131

Reader's Forum

Vacuum Cleaner Advertisement, 38
The Investigation Question: The Key to Successful Inquiry-Based Science – *Kirsten Schlüter & Mark Walker*, 73
More on Inquiry – *Peter Eastwell*, 139

Your Questions Answered

Top Research Need, 38
Teaching to Learning Styles, 74
Inquiry, 94
Life Outside Teaching, 143

Laboratory Safety Guidelines

#1 of 40. Have a Written Safety Policy, 40
#2 of 40. Organise a Safety Committee, 83
#3 of 40. Develop a Safety Orientation Program, 114
#4 of 40. Encourage Caring About One's Health and Safety, 147

Further Useful Resources 41, 83, 115, 147

The Science Education Review

Table of Contents

Volume 5, Issues 1-4, 2006

Did you Know?

Oil and Water do Mix, 1
Atmospheric Carbon Dioxide, 37
Mole Day, 71
Annoying Mobile Phone users, 111

Articles

Rethinking Unsupervised Summative Assessment – *Peter Eastwell*, 1
Learning from History: A Lesson on the Model of the Earth – *Shu-Chiu Liu*, 6
What Uncouples Students' Goals from Students' Outcomes in Introductory Biology Courses? –
Randy Moore, 16
Connecting Inquiry and the Nature of Science – *Erin Peters*, 37
Reassessing Possible Naturalized Ideology Regarding Science, Education, and Religion – *Todd
Campbell*, 44
A Writing Template for Probing Students' Geological Sense of Place – *Renee Clary & Jim
Wandersee*, 51
Levels of Enquiry – *Peter Eastwell*, 61
Co-teaching as an Approach to Enhance Science Learning and Teaching in Primary Schools –
Colette Murphy & Jim Beggs, 63
Communication for Inquiry and Access: Teaching Techniques From Discourse Research – *Susan
Staats, Irene Duranczyk, Randy Moore, Jay Hatch, Murray Jensen, & Charles Somdahl*, 71
Results of a 16-Year Study of Cheating in Introductory Science Classes – *Randy Moore &
Murray Jensen*, 83
The Future of Student Grouping Systems in Science 14-16 – *Stephen Rowcliffe*, 87
The Magic Liquid: A Science Story About Acids and Bases – *Muhamad Hugerat*, 111

The “Magical” Sphere: Uncovering the Secret – *Vladimir M. Petruševski & Miha Bukleski*, 114
To What Extent can Concept Mapping Motivate Students to Take a More Meaningful Approach
to Learning Biology? – *James D. Trifone*, 122
Influencing College Chemistry Success Through High School Chemistry Teaching – *Robert H.
Tai, Philip M. Sadler, & John F. Loehr*, 123

Demonstration

Identify the Number, 4
The World’s Simplest Generator? 80

Student Activity

Collisions, 5
Crystal Ball Power, 81

Critical Incident

Investigating With Models – *Bill MacIntyre*, 13
Alternative Conceptions – *Sue Cavell*, 50
Writing Prompts in the Classroom: Magic for Learning Science – *Israel Kibirige*, 81
A Critical Incident Leads to Classroom Success With “Homebrew” Radio Kits – *Kevin C. Wise*,
118

Science Poetry

My Huntsman Spider, 15
The Mystery of Stars, 15
Asteroids, 51
Poem, 51
Rainforests, 84
Mr Thorpe, 84
Nanotechnology, 121
Ode to Nuclear Fusion, 121

Students’ Alternative Conceptions

Our Natural World, 59
Fossil Fuels - *Audrey Rule*, 85
Cloning, 127

Teaching Techniques

Snakes and Ladders – *Sunitha Pillai*, 16
Engaging all Students in Cooperative Learning – *Lynne Houtz*, 18
The Formula Triangle – *Delma Clifton*, 59
Think Alouds, 86
Less-Than-Ideal Procedure – *Peter Eastwell*, 86
Talking Cards, 128

Ideas in Brief

Futures Studies and Science Education – *David Lloyd & John Wallace*, 20
The Google Calculator, 94
How Wide and Deep are our Genetic Roots? 95

Accepting Technology, Rejecting Responsibility, 95
Teaching to Learning Styles: A Myth, 128
Using Concept-Mapping to Enhance PowerPoint Presentations, 129

Research in Brief

Overcoming the Challenge of Teaching Open Inquiry – *Michal Zion & Esther Shedletzky*, 22
Teachers' Understanding of the Nature and Purpose of Practical Work – *Esin Sahin Pekmez, Philip Johnson, & Richard Gott*, 24
Investigating Nature While Going to School, 96
An STS and Textbook Approach Compared, 97
Cognitive Conflict Versus Direct Teaching, 97

Reader's Forum

Admit You Don't Know- *Eric Sensiba*, 28
Beliefs About Questioning - *Tertia Hogan*, 29
The Burning Candle Question - *Mojca Cepic*, 30
Depth Versus Breadth - *Esther Zirbel*, 63
Draw-A-Scientist Test - *Peter Eastwell*, 97
The "Mobius" Effect - *Louis Rosenblatt*, 99

Your Questions Answered

Mistakes, 31
Cooperative Learning Techniques, 32
Stocking Materials, 33
Maintaining Materials, 33
Classroom Rules, 34
Motivation, Passion, and Love, 65
National Curriculum, 102

The Science Education Review

Table of Contents

Volume 4, Issues 1-4, 2005

Did you Know?

A reply to "but the answer is right," when the working shows no merit, 1
The World's Most Deadly Poison, 39
Geological Timeline, 67
Falling Bullets, 95

Science Stories

Nuclear Testing and Baby Teeth, 1

A Noble Experiment – *Stephen Rowcliffe*, 39

The Great Hartford Circus Fire, 67

The Discovery of Artificial Sweeteners: Good Luck and Bad Science? – *Stephen Rowcliffe*, 95

Articles

Making Real Virtual Labs – *Harry Keller & Edward Keller*, 2

Scanner Art and Links to Physics – *David Russell*, 21

Design-Based Science – *David Fortus*, 40

"P.S. - I'm white too": The Legacy of Evolution, Creationism, and Racism in the United States –
Randy Moore & Carl Chung, 50

World First MarsLink Mission Participants Learn and Enjoy Science – *Dana Barry*, 68

Do Children Have Similar Models of Understanding for Seeing, Hearing, and Smelling? –
Anthony Cuthbert, 72

Informal Science Education for Girls: Careers in Science and Effective Program Elements –
Kathleen Fadigan & Penny Hammrich, 83

Learning From our Students: Photovoice and Classroom Action Research – *Dean Whitfield &*
Helen Meyer, 97

Trouble in the Kitchen: A Problem-Based Activity in Human Biology – *Christopher Clovis*, 106

Transforming Your Practice: Hero or Heretic – *Gary Simpson*, 111

Reflections from a Computer Simulations Program on Cell Division in Selected Kenyan
Secondary Schools – *Mwangi Ndirangu, Joel K. Kiboss, & Duncan W. Wekesa*, 117

The Splashdown Effect: Measuring the Effect of Science Enrichment Programs on Science
Attitudes of Gifted High School Girls and Boys – *Jayne E. Stake & Kenneth R. Mares*, 120

Demonstration

Land Covering the Earth's Surface, 11

The Edible Candle – *Lynne Houtz*, 47

Spread of Disease, 70

The Returning Ball – *Joseph Ireland*, 104

Student Activity

The World's Simplest Motor? 12

Mining and Conserving our Earth Resources: The "Earth Cake" Activity – *Lynne Houtz*, 48

Exploring Animals, 71

Seeing Blood Cells, 105

Critical Incident

On Your Own – *Gary Simpson*, 12

On Two Dark Rocks – *Louis Rosenblatt*, 51

Touching the Learner, Just-In-Time – *Israel Kibirige*, 73

The History of Understanding – *Vladimir Yegorenkov*, 109

Science Poetry

Plastic Bags, 15

The Perfect Job, 16

Science is . . . ?, 53

The Brain Train, 54

The Study of Science, 74
Just Like You!!!, 75
Erupting, 110
That's Science, 110

Students' Alternative Conceptions 17, 55

Three Senses – *Anthony Cuthbert*, 75
Weight of a Candle, 116

Teaching Techniques

Write to Grandma, 19
Science Autobiography, 19
Display of Student Artifacts, 20
Model Analysis of Lab Reports, 20
To Your Corner, 55
Probable Passage, 78
Say Something, 79
Literature Circle, 79
Students' Questions, 116

Ideas in Brief

Computer Projectors, 26
Inquiry Classroom Management Checklist, 27
Interview Assessment, 56
Using Projects to Stimulate Learning, 56
Tab Posters, 79
Service Learning, 80
Habits of Mind, Scholarship, and Decision-Making in Science and Religion – *Colin Gauld*, 118

Research in Brief

Use of Anthropomorphism and Animism in Science Instruction: What do Early Years Teachers Think About it? – *Maria Kellery-Vlahos*, 29
Experiences and Outcomes of Graduate Courses for Elementary and Middle School Teachers Studied On-Line and On-Campus – *Wynne Harlen*, 31
Using Science Fiction Stories to Assess Students' Ideas About the Nature of Science – *Pedro Reiss*, 57
Secondary Science Teachers' Use of Inquiry Science Teaching – *Nam-Hwa Kang*, 80
An Instruction-Preference Interaction in Different Delivery Models of Computer-Assisted Instruction – *Chun-Yen Chang*, 119

Reader's Forum

Cartooning to Engage Students – *Vidya Hajirnis*, 58
Recreating Cuthbert's Experiment – *Gary Simpson*, 90
Inquiry Learning – *Kevin Scully*, 125

Your Questions Answered

Evolution and Species, 32
Getting Students' Attention, 33
Getting Students' Attention (cont.), 59

Evolution and the Origin of Life, 61
Group Roles, 91
Electric Fence Shock, 92
Heat Energy Changes Associated With Dissolving, 93
Individual Student Accountability, 126
Zap From a Car, 127

Teaching Techniques

Press Conference, 19
Element Bingo, 20
Two-Part Chits – *Vidya Hajirnis*, 65
Devising Mnemonics, 66
Jigsaw – *Patrick Croner*, 96
More Mnemonics – *Jade Gopie, Paul Beier, Grant Eyles, & Bruno Testa*, 97
The *Class Points* Game, 122
Show of Fingers, 123
National Flag and Anthem, 123
More Mnemonics, 123

Ideas in Brief

Questions to Avoid Asking, 20
PBL Need not be Difficult, 21
The Narrative Lab Report, 68
Teaching Controversial Issues: An Improved Approach, 68
Whiteboarding, 102
Poster Sessions Using Powerpoint, 103
A Fair Classroom Setting, 129

Research in Brief

- The Activity Model for Scientific Inquiry, 29
Using Drug-Related Topics to Teach Biology and Chemistry, 30
Effect of Inquiry Learning on Physical Science Standardized Scores, 31
Incorporating Problem-Based Learning in Biology Project Work – *Christine Chin*, 77
Factors Affecting the Teaching of Evolution, 104
Using Constructivist Environments to Change Students' Enjoyment of Science Lessons, 130

Your Questions Answered

- How is the molecular structure of substances identified? 37
How long is a DNA strand? 37
What is the difference between inquiry learning and discovery learning? 38
What things should I consider if I am trying to meet the individual learning needs of so many different children in class? 39
What benefits might I gain by maintaining a website, and what suggestions do you have for someone about to try it? 79
Do all animals have hearts? 80
Why don't birds get hit by lightning? 106
How can one assess a guided discovery lesson? 107
I recently placed a bottle of softdrink in the freezer . . . ? 132
Why do stars twinkle, yet planets do not? 134
What changes might be made to teacher education programs to better prepare teachers for the science classroom? 134
Is it still appropriate to teach students in year levels, or should we set classes up in a vertical way? 136

Readers' Forum

Science and Religion – *Harry Keller*, 95

Your Questions Answered

If the pull of the moon causes a high tide, and we rotate past the moon once daily, why don't we experience just one high tide each day? 33
Evolution is an example of historical science, as opposed to experimental science. However, I recall hearing something about evolution being demonstrated with microorganisms in the laboratory. Has evolution really been observed experimentally, or is it just one or more components of the theory that have been demonstrated in the laboratory? 59
Is science education culture free? 95
Why does our hair turn grey? 99

Unlike most materials, a stretched rubber band contracts when heated. Why? 139
Is it necessary to include history of science in the development of the curriculum? If so, Why?
